# Nothing Comes Before **Safety!**

**Field Kit for H-6800  
Lockout-Tagout Handles**

**Safety** is of paramount importance in any work place, particularly when working with hazardous materials. With that in mind, Ham-Let is proud to introduce the ISLT (Integrated Safety Lockout-Tagout) that can easily replace all H-6800 series valve handles on site. Designed to prevent the misuse of media in applications such as those found in refineries, analytical and sampling systems.

## Features

- ISLT can be easily locked out in the closed position to avoid unwanted valve opening.
- ISLT kit can be ordered as an option with the valve or retrofitted to any H-6800 series valve on site.
- ISLT handle is ergonomically designed for each valve size.
- ISLT handle can be offered in a wide range of colors.

## ORDERING INFORMATION: FIELD KIT
